3 Enterprise Risk Management

We implemented a rigorous enterprise risk management ("ERM") system in the aftermath of the 2008 financial crisis, and view this development as a defining event for our institution

This system delivers a systematic approach to risk measurement and enhances the effectiveness of risk management across the institution

Integrating this system into our culture and strategic decision making has improved all functional areas of the business

Significantly improved asset quality by enhancing our underwriting process, and establishing a specific credit appetite that aligns to the broader enterprise risk management framework

Has provided a process to quickly detect and address potential problems in our loan portfolio, greatly improving our ability to manage through the COVID-19 pandemic

We have also implemented monitoring and controls for other functional areas such as: Information security and technology, vendor management, liquidity, interest rate risk, compliance, and company reputation

The ERM program has positioned our Company to better consummate acquisitions with less risk and increased cost savings

We believe we are the only community bank of our size and in our market area to implement such a comprehensive enterprise risk management system

Our Credit Culture

- We have a service-driven, relationship-based, business-focused credit culture, rather than a price-driven, transaction-based culture
- Substantially all of our loans are made to borrowers located, or operating, in our primary market areas with whom we have ongoing relationships across various product lines
- The few loans secured by properties outside of our primary market areas were made to borrowers who are otherwise well-known to us
- We adhere to what we believe are disciplined underwriting standards, but also remain cognizant of serving the credit needs of customers in our primary market areas by offering flexible loan solutions in a responsive and timely manner
- Our lending policies do not provide for loans that are highly speculative, subprime, or that have high loanto-value ratios
- We maintain asset quality through an emphasis on the following:

Local market knowledge	Long-term customer relationships	Consistent and thorough underwriting
Conservative Credit Culture	Loan Portfolio Diversity	Relationship Focused

These components, together with active credit management, are the foundation of our credit culture, which we believe is critical to enhancing the long-term value of our organization to our shareholders, customers, employees, and communities

4 Loan Approval Process

	Striking a Balance Between:							
Prudence	Disciplined Underwriting	Flexibility						
In Our Decision Making and Responsiveness to Customers								

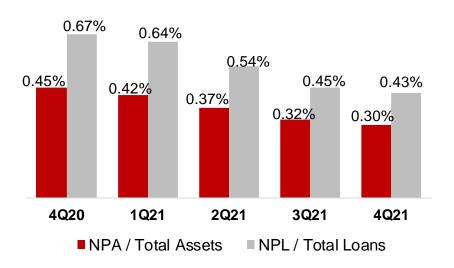

- Loan relationships in excess of an individual officers lending authority up to 3 million may be approved with joint authorities of the market president and senior credit officer.
- Loan relationships over \$3 million are approved by our Executive Loan Committee.
- New loans over \$5 million to a relationship over \$20 million are reported to the Board Credit Risk Committee.
- These limits are reviewed periodically by the Company's Board of Directors
- We believe that our credit approval process provides for thorough underwriting and efficient decision making
